

Registered Behavior Technicians work under the direct supervision of a Board Certified Behavior Analyst and provide 1:1 instruction to children on the autism spectrum in a clinic/community based setting.

- Provide quality 1:1 instruction to children in the areas of communication, social, play, and adaptive skills
- Record objective daily data to reflect client progress towards goals
- Maintain objective daily session notes
- Maintain effective communication with team members and supervisors
- A passion for working with and supporting special needs children
- Strong verbal and written communication, time management, organization and problem solving skills
- Possess the Registered Behavior Technician (RBT) certificate or the willingness to complete the RBT certification
- Prior experience is not required (we offer paid training!) but successful candidates often have prior experience as a behavior technician, counselor, mental health technician, mental health therapist or social worker, or other experience in education, child care or human services.
- Demonstrated understanding of BACB Code of Ethics for RBTs.
- Ability to pass a criminal background check
- Valid Driver's License
